

Turning Citrix Resource Manager Data Into Valuable Information

Webinar Event 7/29/2008

Syntax

Introspect for XenApp

Product Overview

Organizational Information Challenges

- § Senior management is concerned with measuring organizational growth, managing costs and ensuring compliance
- § Business line management is focused on productivity and workforce enablement
- § IT management is focused on operational visibility to manage change, optimize resources and minimize troubleshooting

Organizational Need to Turn Data into Valuable Information

- § Citrix collects detailed system usage and configuration data in Resource Manager and the DataStore databases
- § Valuable information exists but is difficult for customers to utilize
- § Organizations typically resort to custom reporting, manual processes or guesswork

Introspect for XenApp

Utilizing multi-dimensional analytics technology, Introspect delivers powerful insight into usage trends and farm configurations captured by Citrix XenApp.

Introspect – Key Benefits

§ Capacity Planning

- § Understand your resource usage trends and optimization your infrastructure

§ Configuration Analysis

- § Visualize application, user and server configurations to manage your farm and support troubleshooting

§ Analyze License Usage

- § Ensure you have the appropriate licensing based on actual usage and growth

§ Charge Back / Billing

- § Implement or enhance charge back programs and recoup IT costs based on business unit usage statistics

§ Application Management

- § Ensure top used applications have sufficient resources and identify unused or under utilized software

§ Audits

- § Support strategic compliance, security governance initiatives such as HIPAA, SOX and ITIL

Introspect Customer Use Cases

§ West Corporation

- § Delivering chargeback reports to each business unit for application usage

§ IBM

- § Fulfilling SLA's with Fortune100 company using concurrent usage reports that due to volume of data were impossible to create without Introspect

§ HSBC

- § Collecting advanced user metrics for server growth planning and security audits

§ Clifton Gunderson

- § Saved \$65,000 annually by reducing applications published by 7% and licenses by 15%.

Introspect Delivers Valuable Information

§ Scalable analytics engine

- § Fast performance accessing an unlimited usage history
- § No Agent - processing does not impact Citrix performance

§ Powerful report generation

- § Over 50 point-and-click templates included or create ad-hoc reports with no coding
- § Advanced charts and graphs
- § Export to popular file formats including: Excel, HTML, PDF, Crystal or XML

§ Integration with Active Directory to ease user and group reporting

§ Report automation and delivery

§ Fast implementation in as little as 1 hour

Introspect Report Examples

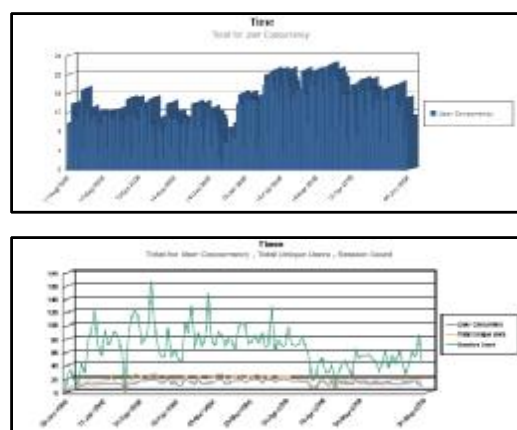

Over 50 point-and-click standard templates:

Active Directory and Custom Groups

Session ID	User Name	Session Count	Session To LBA	Session To LBA
1. Over 47 (4)	100	100	100	100
2. Over 47 (4)	100	100	100	100
3. Over 47 (4)	100	100	100	100
4. Over 47 (4)	100	100	100	100

Session Reports

Concurrency Reports

Resource Name	Session Count	Session To LBA	Session To LBA
1. Over 47 (4)	100	100	100
2. Over 47 (4)	100	100	100
3. Over 47 (4)	100	100	100
4. Over 47 (4)	100	100	100

Capacity Planning Reports

Memory / CPU Statistics

User Access by IP Address

Introspect New Features

§ Key Features

- § Analyze application, server, and user configuration for a server farm
- § Detailed view of application and server properties
- § Matrix reports illustrate where applications are installed and user/group access
- § Server hotfix reporting
- § Support for SQL Server 2005

	CXAP-LAB-UEA01	CXAP-LAB-UEA02
Citrix ASC		x
Citrix Shadow Taskbar		x
MS Project 2003	x	x
MS Visio 2003	x	
Notes 702	x	x

Configuration Analysis

§ Key Use Cases

- § Farm deployment documentation
- § User access management
- § Configuration troubleshooting
- § Optimization analysis
- § Server hotfix reporting

Configuration Analysis Examples

MS Project 2003

Properties

Application Name: MS Project 2003
 Session Window Size: Percent of client desktop (95)
 Colors: High Color (16 bit)
 Hide Application Title Bar: False
 Maximize Application at Startup: True
 Limit Instance In Farm: No (Unlimited)
 Allow Only One Instance for Users: False
 CPU Priority Level: Normal
 Command Line: "C:\Program Files\Microsoft Office\MS Project 2003\MSProject.exe"
 Working Directory: C:\Program Files\Microsoft Office\MS Project 2003
 Isolate Application: False

Servers

CXAP-LAB-UEA01
 CXAP-LAB-UEA02

Users

Engineering (Group)
 Sales (Group)
 Marketing (Group)

Visualize Apps, Servers, Users

Engineering (Group)

Members

1. Raul, Robin (RobinR)
 2. Moylan, Mark (MarkM)
 Total: 2 users

Applications

MS Project 2003

Properties

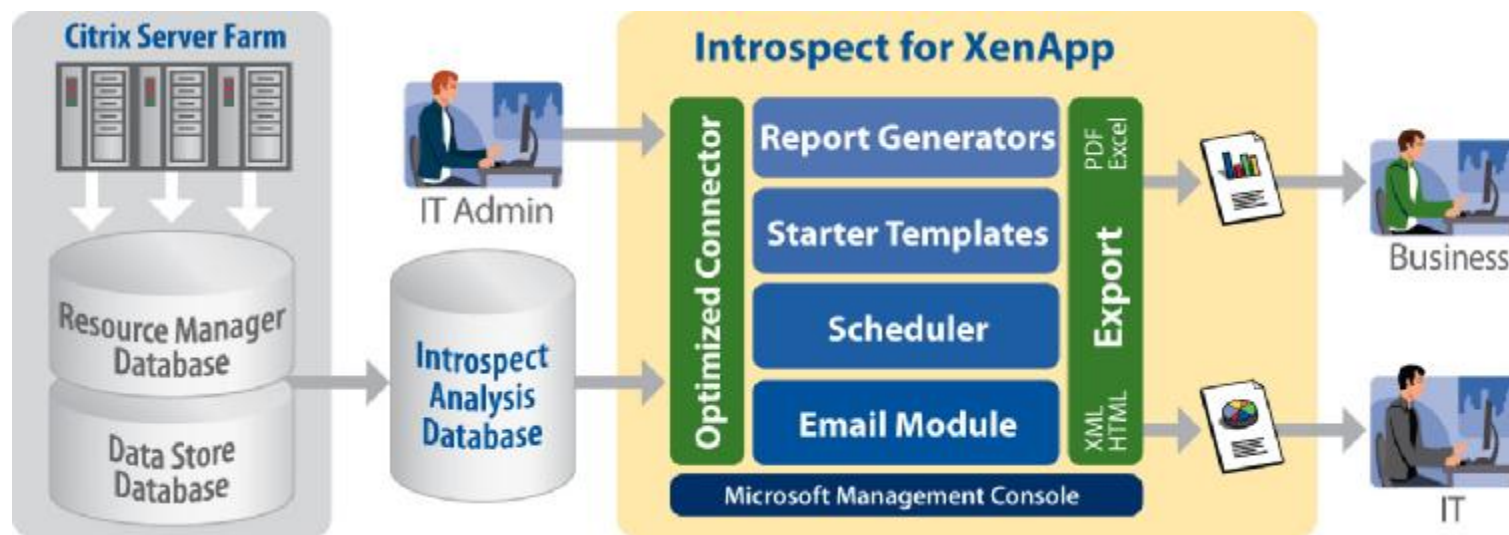

Session Window Size: Percent of client desktop (95)
 Colors: High Color (16 bit)
 Hide Application Title Bar: False

User analysis with AD Integration
